Iten Industries, Inc. (Iten)

Conflict Minerals Statement

Iten Industries, Inc. (Iten) is aware and concerned by reports that profits from the sale of certain metals mined in the Democratic Republic of Congo (DRC) or adjoining countries have helped fuel war and human rights violations in the eastern Congo. Section 1502 of the Dodd- Frank Wall Street Reform and Consumer Protection Act imposes new supply chain reporting requirements on U.S. publicly traded companies to promote transparency and consumer awareness regarding the use of "conflict minerals" (tin, gold, tantalum, and Tungsten, or "3TG") that directly or indirectly finance or benefit armed groups in that region of the Congo.

While not a publicly traded company, Iten supports the goal of ending violence, human rights violations, and environmental devastation in the covered countries. We are committed to supporting the aims and objectives of the U.S. legislation on the supply of conflict minerals.

Based on information given to us from our raw materials suppliers and Iten's formulations:

To the best of our knowledge, the current substances that are identified in the list above are not a part of any of the formulations that affect our material and are not added during our manufacturing process.

Iten has an ongoing process to ensure that all of our raw material vendors communicate to us any changes in their formulation.

This statement is in respect to all products manufactured at Iten in their original form.

For more information on current directives, use the link below:
